

ORDER# HR-2021-943774381821

EFFECTIVE IMMEDIATELY

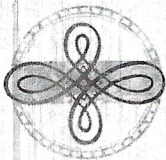

The Global Health & Wellness Consortium (GHWC) is the leading global health authority registered in the national archives of every nation. The date of that ratification (HR 616847221) is July 6, 2021.

Dozens of peer-reviewed science papers prove that face masks are dangerous and ineffective. At least 47 published scientific papers confirm that face masks are useless at preventing Covid-19 infection and spread, while another 32 point out the specific health damage caused by wearing a mask.

A study done in Florida in June 2021 on children's face masks found 11 dangerous pathogens on the masks:

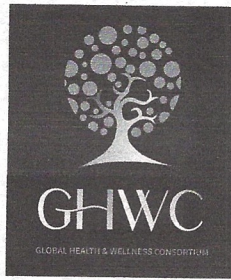

1. Streptococcus pneumoniae (pneumonia)
2. Mycobacterium tuberculosis (tuberculosis)
3. Neisseria meningitidis (meningitis, sepsis)
4. Acanthamoeba polyphaga (keratitis and granulomatous amebic encephalitis)
5. Acinetobacter baumannii (pneumonia, bloodstream infections, meningitis, UTIs—resistant to antibiotics)
6. Escherichia coli (food poisoning)
7. Borrelia burgdorferi (causes Lyme disease)
8. Corynebacterium diphtheriae (diphtheria)
9. Legionella pneumophila (Legionnaires' disease)
10. Staphylococcus pyogenes serotype M3 (severe infections—high morbidity rates)
11. Staphylococcus aureus (meningitis, sepsis)

Half of the masks were contaminated with one or more strains of pneumonia-causing bacteria. One-third were contaminated with one or more strains of meningitis-causing bacteria. One-third were contaminated with dangerous, antibiotic-resistant bacterial pathogens. In addition, less dangerous pathogens were identified, including pathogens that can cause fever, ulcers, acne, yeast infections, strep throat, periodontal disease, Rocky Mountain Spotted Fever, and more.

Hall of Records

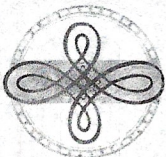

All mask mandates have proven counter-productive in preventing disease and must stop immediately. That includes all modes of transportation (airlines, trains, busses, etc.), all government facilities, all public venues, all places of business, and all educational institutions. Wearing a mask is a choice. Mandating masks is a violation of our natural law. All people deserve to breathe freely.

Health Authorities in Industries that require mask wearing due to hazardous conditions or to prevent injury, such as, but not limited to, OSHA, NHS, and The Surgeon General all require masks to be removed every 2 hours for a minimum of a 20-minute break due to the decrease in available oxygen. A decreased level of oxygen may cause brain fog, long term brain injury and even death. If people out of free will choose to wear a mask, then the above protocol must be followed.

If school age children are wearing a mask by parental consent, then a strict protocol must be administered by school personnel of brushing teeth, using mouthwash and hygiene after eating before reinstalling the mask in order to prevent pneumonia, gum disease, tooth decay, pleurisy etc. Notice must go out to the parents which must contain the following statements:

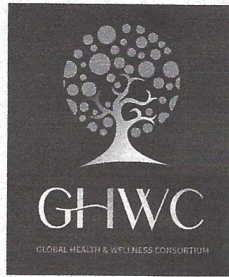

- Prolonged wearing of a mask has been known to cause impaired judgement, impaired ability to learn, impaired ability to focus, impaired ability to retain information, cause irritability, blurred vision, candida infections, lung infections, eye infections, dental/oral infections as well as many other ailments.
- If you choose for your child to wear a mask, the masks must be clean and be changed preferably every 2 hours.
- Proper oral hygiene guidelines must be followed and your child, if wearing a mask, must bring to school: mouthwash, toothpaste, dental floss, and a toothbrush.

Failure to comply with this order will result in immediate grounds for criminal prosecution, and all who are in violation of this order will be held accountable in both personal and private capacities.

Hall of Records

This Order will be enforced by the Global Intelligence Agency and Life Force Enforcement.
